# Sarva Shreshtha Dan Vidyadan SAMAJ SHIKSHAN MANDAL'S AMRUTESHWAR ARTS, COMMERCE & SCIENCE COLLEGE

At post – Vinzar, Tal.- Velhe, Dist. – Pune

2.6.1 Program outcomes, Program Specific outcomes, for all program offered by the institute are started and displayed on website and communicated to the teachers & students

#### **Program Outcomes**

#### **Program outcomes of Bachelor of Arts**

- PO1. Demonstrate a detailed knowledge and understanding of selected fields of study in core disciplines in humanities, social sciences and languages.
- PO2. Articulate the relationship between diverse forms of knowledge and the social, historical and cultural contents that produced them.3) Communicate effectively and in the case of those students undertaking a language major, need, write, listen to and speak another language with fluency and appreciate its cultural context.
- PO3. Reading, Writing skills and Process:- Students will become accomplished, active readers to appreciate ambiguity and complexity and who can articulate their own interpretations with an awareness and curiosity for other perspectives. Students will be able to write effectively for a variety of professional and social setting. they will develop an awareness and confidence in their own voice as a writer and analyze complex social and natural problems with the help of their degree specialization.
- PO4. Sense of Genre:- Student will develop an appreciation of how the formal elements of language and genre shape meaning and they will develop a facility at writing in appropriate genres for research and other variety of purposes.
- PO5. Critical Approaches:- Students will develop the ability to read works of literary, rhetorical, research, cultural criticism and develop idea with the help of their specialization. They will express their own ideas as informed opinions, small projects, practical, research papers and understand how their own approach compares to variety of critical and theoretical approaches.
- PO6. Oral communication skills:- Student will demonstrate the skill needed to participate in conversation that builds knowledge collaboratively. Listening carefully and respectfully to others view points. Articulating their own ideas and questions clearly and situating their own ideas in relation to other voices and ideas. Student will be able to prepare, organize and deliver and engaging oral presentation.
- PO7. Ethics:- Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

#### **Program outcomes of Bachelor of Commerce**

PO1. Demonstrate knowledge of major theories and models in key areas of organizational

behavior.

- PO2. Analysis Organizational problems and generate realistic solutions based on current academic research in organizational behavior.
- PO3. Apply basic mathematical and statistical skills necessary for analysis of a range of problems in economics actuarial studies, Accounting, Marketing, Management and Finance.
- PO4.**Environment Awareness :** Understand the issues and problems of environmental context and develop environmental awareness in the mind.
- PO5.Consumer Movement : Make people aware about consumer movement, rights & duties, laws relating to consumers.
- PO6.**Sound knowledge of various laws :** Impart the knowledge of basic concepts, terms & provisions of company law, Mercantile law, Income Tax and other laws affecting business, trade and commerce.

#### **Program outcomes of Bachelor of Science**

- PO1. Articulate the methods of and science and explain why current scientific knowledge is both contestable testable by future inquiry.
- PO2. Apply appropriate methods of research, investigation and design, to solve problem in science, mathematics, technology including the planning and conduct of a significant project problem or investigation.
- PO3. Articulate the relationship between different science communities of practice, the international scope of science, mathematics, technology and engineering knowledge and methods and the contributions to their development that have been made by people with diverse perspectives, culture and backgrounds.
- PO4. Students will develop the ability to read works of literary, rhetorical, research, cultural criticism and develop idea with the help of their specialization. They will express their own ideas as informed opinions, small projects, practical, research papers and understand how their own approach compares to variety of critical and theoretical approaches.

#### **Program Specific Outcomes:**

POS are to be listed for all graduates program separately i.e.

#### **Program Specific Outcomes for Marathi**

अभ्यासक्रमाची उदीष्टे:

- १. कथा या साहित्यप्रकाराची ओळख करून देणे.
- २. कथा या साहित्यप्रकाराचे स्वरूप, घटक प्रकार याांची ओळख करून देणे.
- ३. हिहिध साहित्यप्रवाहातील कथा या साहित्यप्रकारातील निवडक कथाांचे अध्ययन करणे.

४. भाषिक कौशल्यविकास करणे.

#### **Program Specific Outcomes for English**

- PSO 1. Teaching of the basic concepts of English language and literature.
- PSO 2. Learning of Characteristics of literature in English, diverse literary historical periods and
- cultures PSO 3. Application of literary critical perspectives to generate original analysis of

literature in English PSO 4. Promotion of cultural values through English language

#### **Program Specific Outcomes for Geography**

- PSO1. Understand the nature and basic concept of geography
- PSO2. Understand the applied and professional nature of geography such as fields of G.I.S. and surveying
- PSO3. Understand the application of modern geography techniques such as geographical information system in society as well as environmental and settlement geography, hazards, language land cover etc.

#### **Program Specific Outcomes for Polities**

- PSO1. Understand social stratification of castes and jatis, from language, religion, ethic and economic determinants and critically assesses its impact on the political processes
- PSO2. To understand the core doctrines of each of the ideologies and to make sense of politics through different ideological perspectives.
- PSO3. Understand legacy of the thinkers is explained with the view to establish the continuity and change within the Western political tradition.

#### **Program Specific Outcomes for Economics**

- PSO 1. Understand the difference between Micro Economics & Macro Economics
- PSO2. Understand techniques & diagrams related to employment theory
- PSO3. Understand the concept of Foreign Exchange, International Banking & Euro Currency Market
- PSO4. To study the international policies

#### **Program Specific Outcomes for Commerce**

- PSO1. Understand application of mathematical & Statistical concepts and techniques in solving business problems.
- PSO2. Develop the insights regarding organizational skills, functioning of modern appliances, e format records in modern office.
- PSO3. Stimulate the student's interest by showing the relevance and use of various economic theories.
- PSO4. Develop the capability of students for knowing banking concepts and operations.

PSO5. Analyze the basic concept in marketing and prepare to face the relevant changes in the field of marketing .

PSO6. Know the basic concepts, terms and provisions of mercantile & business laws.

- PSO7. Instill the knowledge about accounting procedures, methods & techniques.
- PSO8. Develop business communication skills.
- PSO9. Develop cost consciousness and analytical bent of mind.

#### **Program Specific Outcomes for Physics**

PSO1.To understands the basic concept of mechanics, electrodynamics, quantum mechanics.

PSO2. To understand the concepts of energy, work, power, the concepts of conservation of

energy, elasticity, surface tension and viscosity.

PSO3. To understand optical phenomena such as polarization, birefringence, interference and diffraction in terms of the wave model and to analyze simple examples of interference and diffraction phenomena.

#### **Program Specific Outcomes for Chemistry**

- PSO1. Physical chemistry: Review of conventional processes, recent advance techniques. surface properties, ionic properties and other special characteristics of substances,
- PSO2. Inorganic chemistry: Introduction to molecular symmetry, co-ordination of compounds and Bio-inorganic chemistry.
- PSO3. Organic chemistry: Introduction to fundamental concepts and principles of process synthesis. Proficiency in Synthetic skill, Characterization by various analytical techniques, Micro- techniques and in-depth knowledge in subject is evaluated by allotting synthetic scheme.

#### **Program Specific Outcomes for Botany**

- PSO1. To understand the physiological process in plants
- PSO2. To Study biotechnological process, use of various plants resources at commercial level.
- PSO3. To study the variation of plants life at all levels of biological organization.

#### **Program Specific Outcomes for Microbiology**

- PSO1. Acquiring the basic concepts of Taxonomy, Biostatistics, Bioinformatics, Biochemistry, Biophysics, Waste water engineering and Virology.
- PSO2. Finding the suitability of microorganisms and interlinking its role in industry.
- PSO3. Exploring microorganisms in the treatment of waste.
- PSO4. Studying the instrumentation involved in isolation, identification of microorganisms, biochemistry and molecular biology.

#### **Program Specific Outcomes for Mathematics**

- PSO1. To develop problem solving skill, mathematical modeling abilities, rational thinking.
- PSO2. To inculcate ability to use logical way formulate theories
- PSO3. To make them ready in the world of computing and artificial intelligence.
- PSO4. To equip them with various tools such as mathematical software, computational techniques etc.
- PSO5. To motivate them for applying developed theory for continuing further study in various fields of science.
- PSO6. To opt for higher education

| SYBA | 2167  | (GENERAL PAPER-<br>2) POLITICAL<br>THEORY &<br>CONCEPTS | <ul> <li>This is an introductory paper to the concepts, ideas and theories in political theory.</li> <li>It seeks to explain the evolution and usage of these concepts, ideas and theories with reference to individual thinkers both historically and analytically.</li> <li>The different ideological standpoints with regard to various concepts and theories are to be critically explained with the purpose of highlighting the differences in their perspectives and in order to understand their continuity and change.</li> <li>Furthermore there is a need to emphasize the continuing relevance of these concepts today and explain how an idea and theory of yesteryears gains prominence in</li> </ul>  |
|------|-------|---|---|
|      | 21.00 |   | contemporary political theory.  |
|      | 2168  | (SPECIAL PAPER- I)                                      | • This paper studies the classical tradition in political   |
|      |       | WESTERN<br>POLITICAL<br>THOUGHT                         | <ul> <li>theory from Plato to Marx with the view to understand<br/>how the great Masters explained and analyzed political<br/>events and problems of their time and prescribed<br/>solutions.</li> <li>The texts are to be interpreted both in the historical and<br/>philosophical perspectives to understand the universality<br/>of the enterprise of political theorizing.</li> <li>The limitations of the classical tradition, namely its<br/>neglect of women's concerns and issues and the non-<br/>European world are critically examined.</li> <li>The legacy of the thinkers is explained with the view to<br/>establish the continuity and change within the Western<br/>political tradition.</li> </ul> |
|      | 2169  | (SPECIAL PAPER- II)<br>POLITICAL<br>SOCIOLOGY           | <ul> <li>This Course will introduce the overall scope of the sub-<br/>discipline of political sociology. The focus of the<br/>course will be on the political sociology of power.</li> <li>The emphasis is on the nature of power in modern<br/>societies—more in the form of organizations and social<br/>formations than as individual power.</li> <li>Students are also expected to understand different<br/>forms of justifications of power and the role of<br/>ideology in this regard.</li> <li>State will be studied as a repository of power in society<br/>while class and patriarchy are two instances of how the<br/>nature of power is shaped by social factors.</li> </ul>                            |

|      | 1    |   | 1  |
|------|------|---|--|
| TYBA | 3167 | (General Paper -3)<br>POLITICAL<br>IDEALOGIES | <ul> <li>This paper studies the role of different political ideologies and their impact in politics.</li> <li>Each ideology is critically studied in its historical context. In course of its evolution and development, the different streams and subtle nuances within each ideology, the changes and continuities in its doctrine and its relevance to contemporary times are highlighted.</li> <li>The close link between an idea and its actual realization in public policy needs to be explained as well. The philosophical basis of the ideologies is emphasized with special emphasis on key thinkers and their theoretical formulations. The legacy of all the major ideologies is to be critically assessed.</li> </ul> |
|      | 3168 |   |  |
|      |      | PUBLIC<br>ADMINISTRAION                       | <ul> <li>This paper is an introductory course in<br/>Public Administration.</li> <li>The essence of Public Administration lies in its<br/>effectiveness in translating the governing philosophy<br/>into</li> </ul>  |
|      |      | (Special Paper -3)                            | <ul> <li>programme, policies and activities and making it a part of community living.</li> <li>The paper covers personnel public administration in its historical context thereby proceeding to highlight several of its categories, which have developed administrative salience and capabilities to deal with the process of change.</li> <li>The recent developments and particularly the emergence of New Public Administrations are incorporated within the larger paradigm of democratic legitimacy.</li> <li>The importance of legislative and judicial control over administration is also highlighted</li> </ul>  |

|       | 3169          | INTERNATION<br>AL POLITICS<br>(Special Paper -<br>4) | <ul> <li>This paper deals with concepts and dimensions of international relations and makes an analysis of different theories highlighting the major debates and differences within the different theoretical paradigms.</li> <li>The dominant theories of power and the question of equity and justice, the different aspects of balance of power leading to the present situation of a unipolar world are included.</li> <li>It highlights various aspects of conflict and conflict resolution, collective security and in the specificity of the long period of the post Second World War phase of the Cold War, of Détente and Deterrence leading to theories of rough parity in armaments.</li> </ul> |

## **Course Outcomes of Physics Dept**

| Class    | Course / Paper   | Learning Outcomes  |
|----------|--|--|
| F.Y.B.Sc | Sem 1  | □To foster scientific attitude, provide in-depth knowledge of  |
|          | pHY-   | scientific and technological concepts of Physics.  |
|          | 111Mechanics and   | □To enrich knowledge through problem solving, minor/major  |
|          | Properties of  | projects, seminars, tutorials, review of research articles/papers,   |
|          | Matter   | participation in scientific events, study visits, etc.   |
|          | PHY-112<br>Physics Principles<br>and Applications<br>PHY-113<br>Physics<br>Laboratory-<br>IA1.               | <ul> <li>To familiarize with recent scientific and technological developments.</li> <li>To create foundation for research and development in Physics.</li> <li>To help students to learn various experimental and computational tools thereby developing analytical abilities to address real world problems.</li> <li>To train students in skills related to research, education, industry, and market.</li> <li>To help students to build-up a progressive and successful career in Physics</li> </ul> |
|          | Sem2<br>Compulsory<br>Course<br>PHY-121Heat and<br>Thermodynamics<br>PHY-<br>122Electricity and<br>Magnetism |  |
|          |  |  |
| •        | PHY-   |  |
|          | PHY-<br>123Physics   |  |
|          | Laboratory-IB  |  |
| S.Y.B.Sc | Semester - I   | • Understand the complex algebra useful in physics courses   |
| •        | Paper-I :  | • Understand the concept of partial differentiation.   |
|          | PH211:   | • Understand the role of partial differential equations  |
|          | Mathematical   | Understand vector algebra  |
|          | Methods in   | • Understand the singular points of differential equation  |
|          | Physics - I  |  |
|          | Semester - I   | • To apply laws of electrical circuits to different circuits.  |
|          | Paper-II :   | • To understand the relations in electricity   |
|          | PH212:   | • To understand the properties and working of transistors.   |
|          | Electronics - I  | • To understand the functions of operational amplifiers.   |

| <ul> <li>To design circuits using transistors and operational amplifiers.</li> <li>To understand the Boolean algebra and logic circuits.</li> <li>To understand the physics and mathematics of oscillations.</li> <li>To solve the equations of motion for simple harmonic, damped and forced oscillators and understand their physical content in a variety of applications along with their problems.</li> <li>To describe oscillatory motion with graphs and equations, and these descriptions to solve problems of oscillatory motion.</li> <li>To explain oscillation in terms of energy exchange, giving various examples.</li> <li>To understand the mathematical description of travelling and standing waves and the one-dimensional classical wave equatio and solutions to it.</li> <li>To explain the Doppler effect, and predict in qualitative terms frequency change that will occur for a stationary and a moving observer.</li> </ul> |
|--|
| Semester - II<br>Paper – I<br>PH221:<br>Oscillations,<br>Waves and Sound• To understand the physics and mathematics of oscillations.<br>• To solve the equations of motion for simple harmonic, damped<br>and forced oscillators and understand their physical content in a<br>variety of applications along with their problems.<br>• To describe oscillatory motion with graphs and equations, and<br>these descriptions to solve problems of oscillatory motion.<br>• To explain oscillation in terms of energy exchange, giving<br>various examples.<br>• To understand the mathematical description of travelling and<br>standing waves and the one-dimensional classical wave equatio<br>and solutions to it.<br>• To explain the Doppler effect, and predict in qualitative terms<br>frequency change that will occur for a stationary and a moving   |
| <ul> <li>Paper – I</li> <li>PH221:</li> <li>Oscillations,</li> <li>Waves and Sound</li> <li>To describe oscillatory motion with graphs and equations, and these descriptions to solve problems of oscillatory motion.</li> <li>To explain oscillation in terms of energy exchange, giving various examples.</li> <li>To understand the mathematical description of travelling and standing waves and the one-dimensional classical wave equation and solutions to it.</li> <li>To explain the Doppler effect, and predict in qualitative terms frequency change that will occur for a stationary and a moving</li> </ul>   |
| <ul> <li>these descriptions to solve problems of oscillatory motion.</li> <li>To explain oscillation in terms of energy exchange, giving various examples.</li> <li>To understand the mathematical description of travelling and standing waves and the one-dimensional classical wave equatio and solutions to it.</li> <li>To explain the Doppler effect, and predict in qualitative terms frequency change that will occur for a stationary and a moving</li> </ul>   |
| frequency change that will occur for a stationary and a moving   |
|  |
| • To define the decibel scale qualitatively, and give examples of sounds at various levels.  |
| • To explain in qualitative terms how frequency, amplitude, and wave shape affect the pitch, intensity, and quality of tones   |
| produced by musical instruments  |
| Semester - II<br>Paper - II<br>PH222:• To understand to acquire the basic concepts of wave optics.<br>• To describe how light can constructively and destructively<br>interfere  |
| OPTICS • To explain why a light beam spreads out after passing through aperture  |
| • To summarize the polarization characteristics of electromagne<br>waves   |
| • To appreciate the operation of many modern optical devices the utilize wave optics   |
| •To understand optical phenomena such as polarization,<br>birefringence, interference and diffraction in terms of the wave<br>model and to analyze simple examples of interference and<br>diffraction phenomena.   |
| • To be familiar with a range of equipment used in modern option   |
| PH223:<br>Practical Course• To use various instruments and equipment.<br>• To design experiments to test a hypothesis and/or determine th<br>value of an unknown quantity.   |
| <ul><li>To investigate the theoretical background to an experiment.</li><li>To set up experimental equipment to implement an experiment</li></ul>  |
| <ul> <li>approach and to analyze data, plot appropriate graphs and reach conclusions from your data analysis.</li> <li>To work in a group to plan, implement and report on a</li> </ul>  |
| project/experiment.  |
| <b>T.Y.B.S</b> Semester - III • To understand the Cartesian, spherical polar cylindrical and   |

| c. | Paper-I :             | general curvilinear co ordinate system.  |
|----|-----------------------|--|
| ι. | PH331 :               | <ul> <li>To understand the partial differential equation method of</li> </ul>  |
|    | Mathematical          | separation of variables frobenius method for power   |
|    | Methods in            | series solution.   |
|    | Physics - II          | <ul> <li>To understand the special function legendre hermite and Bessel</li> </ul>   |
|    | 1 1195105 - 11        | 1 0  |
|    |                       | function with its generating function.   |
|    |                       | • To understand the Newtonian relativity, Michelson Morley   |
|    |                       | experiment and concept of special theory of relativity.  |
|    | Semester - III        | • Understand the properties of metals on the basis of the free and   |
|    | Paper-II :            | nearly-free electron gas models.   |
|    | PH332 :               | • Understand the magnetic properties of condensed matter.  |
|    | Solid State           | • Understand the optical properties of solids and the relation to  |
|    | Physics               | their electronic properties.   |
|    | Semester - III        | • Understand the Newtonian mechanics and solve the problem   |
|    | Paper-III :           | related the motion of system of particles.   |
|    | РН333 :               | • Understand central force and their features Kepler's laws of   |
|    | Classical             | planetary motion.  |
|    | Mechanics             | • Understand the scattering of particles with laboratory and center  |
|    |                       | of mass system.  |
|    |                       | • Understand the Hamiltonian formulations.   |
|    |                       | • Understand the passion bracket.  |
|    | Semester - III        | • Understand the atomic structure.   |
|    | Paper-IV :            | • Understand the Pauli's exclusive principle and spinorbit   |
|    | PH334 :               | interaction.   |
|    | Atomic and            | • Understand the concept of Zeeman effect, Raman effect.   |
|    | Molecular             | • Understand the concept of X rays spectroscopy.   |
|    | Physics               | • Understand the types of molecular spectroscopy.  |
|    | Semester - III        | • To identify modern programming methods and describe the  |
|    | Paper-V :             | extent and limitations of computational methods in physics.  |
|    | PH335 :               | <ul> <li>To identify and describe the characteristics of various numerical</li> </ul>  |
|    | Computational         | methods.   |
|    | Physics               | <ul> <li>To formulate and computationally solve a selection of</li> </ul>  |
|    |                       | problems in physics.   |
|    |                       | <ul> <li>To use the tools, methodologies, language and conventions of</li> </ul>   |
|    |                       | physics to test and communicate ideas and explanations.  |
|    | Semester - III        |  |
|    |                       | • To describe the various renewable energy sources and the   |
|    | Paper-VI :<br>PH336 : | possible conversion paths to a useful form of energy.  |
|    | (Optional)            | <ul> <li>To study the different Characteristics of Sun.</li> <li>To symptom the principles that underlie the shility of various</li> </ul> |
|    | Renewable             | • To explain the principles that underlie the ability of various   |
|    | Energy Sources        | natural phenomena to deliver solar energy and to study the   |
|    | Linergy Sources       | technologies that are used to harness the power of solar   |
|    |                       | energy.  |
|    |                       | • To discuss the positive and negative aspects of solar energy in  |
|    |                       | relation to natural and human aspects of the environment.  |
|    |                       | • To describe the working principle of photovoltaic effect in  |

|  | solar cell and to discuss its use as the integration of intermittent  |
|--|---|
| Semester - IV<br>Paper-I :<br>PH341 :<br>Classical<br>Electrodynamics        | <ul> <li>renewable electricity into the grid system through laboratory exercises and its efficiency.</li> <li>To study the wind energy and its power, energy production and the effect of the blade design.</li> <li>To describe how biomass is used as a source of energy in providing energy and in producing alternative fuels.</li> <li>To study the formulation of Maxwell's equations.</li> <li>To use the Lorentz transformation to transform fields and sources from one inertial frame to another.</li> <li>To derive detailed expressions for the nature of electrodynamics.</li> <li>To apply Maxwell's equations to solve problems in classical electrodynamics.</li> <li>To understand transport of energy and Poynting vector.</li> </ul> |
| Semester - IV<br>Paper-II :<br>PH342 :<br>Quantum<br>Mechanics               | <ul> <li>To study the historical aspects of development of quantum mechanics.</li> <li>To understand and explain the differences between classical and quantum mechanics.</li> <li>To understand the idea of wave function.</li> <li>To understand the uncertainty relations.</li> <li>To solve Schroedinger equation for simple potentials.</li> <li>To study, identify and relate the eigenvalue problems for energy, momentum, angular momentum and central potentials with the idea of spin.</li> </ul>   |
| Semester - IV<br>Paper-III :<br>PH343 :<br>Thermodynamics<br>and Statistical | <ul> <li>To identify and describe the statistical nature of concepts and laws in thermodynamics, in particular: entropy, temperature, chemical potential, Free energies, partition functions.</li> <li>To use the statistical physics methods, such as Boltzmann</li> </ul>   |

| Physics Physics Semester - IV Paper-IV : PH343 : Nuclear Physics                         | <ul> <li>distribution, Gibbs distribution, Fermi-Dirac and Bose-Einstein distributions to solve problems in some physical systems.</li> <li>To apply the concepts and principles of black-body radiationto analyze radiation phenomena in thermodynamic systems.</li> <li>To apply the concepts and laws of thermodynamics to solve problems in thermodynamic systems such as gases, heat engines and refrigerators etc.</li> <li>To analyze phase equilibrium condition and identify types of phase transitions of physical systems.</li> <li>To design, set up, and carry out experiments; analyze data recognizing and accounting for errors; and compare with theoretical predictions.</li> <li>To describe the properties and structure of stable nuclei.</li> <li>To understand the properties of the nuclear force properties and their theoretical descriptions.</li> <li>To understand the shell model and be able to explain radioactive processes.</li> <li>To study beta decays and its properties for nuclear reactions.</li> </ul> |
|--|--|
| Semester - IV<br>Paper-V :<br>PH345 :<br>Electronics - II<br>Semester - IV<br>Paper-VI : | <ul> <li>topics covered.</li> <li>To understand the basic working principles of different semiconductor diodes.</li> <li>To classify the different types of amplifiers with reference to their mode of operation, efficiency.</li> <li>To study the basic working principle and characteristics of JFETs, MOSFETs and their applications.</li> <li>To study the different applications of OPAMP and Timercircuits with illustrative problems.</li> <li>To study the special ICs designed for regulator power supply and their characteristics.</li> <li>To the different combinational and sequential logic circuits and their applications.</li> <li>To understand the fundamentals of microcontroller systems .</li> </ul>   |
| Paper-VI :<br>PH346 :<br>Optional  | <ul><li>To study the architecture of Microcontroller 8051.</li><li>To study the programming model, working principle of</li></ul>  |

| Microcontrollers                                      | <ul> <li>assembler; assembler directives.</li> <li>To use instruction set of assembly languages of 8051microcontroller in developing programs.</li> <li>To interface to external memory, use of stack in subroutine calls and interrupt services, access of built-in I/O ports, timers and counters.</li> <li>To study I/O Interfacing of the different applications like keyboard scanning, display multiplexing, LCD controllers, interface of IC's analogue and digital conversion (ADC / DAC), serial interface standards RS-232 in communication</li> </ul>  |
|---|---|
| <b>PH347:</b><br>Laboratory<br>Course -I              | <ul> <li>systems.</li> <li>To design experiments in General Physics to test a hypothesis and/or to determine the value of an unknown quantity.</li> <li>To investigate the theoretical background to an experiment.</li> <li>To set up experimental equipment to implement an experimental approach and to analyze data, plot appropriate graphs and reach conclusions from your data analysis.</li> <li>To work in a group to plan, implement and report on a project/experiment.</li> </ul>   |

## **Course Outcomes of Chemistry Dept**

| Course<br>Code:-Paper-<br>II | FY BSc Inorganic and Organic Chemistry Sem I  |
|------------------------------|---|
|                              | The fundamental concepts which govern the structure, bonding, properties and reactivities of organic molecules such as covalent character, hybridization, bond angles, bond energies, bond polarities and shapes of molecules |
| CO2                          | Drawing of organic molecules and arrow pushing concept.   |
| CO3                          | Acid-base theories, pKa / pKb values for common organic acids and bases and factors affecting strength of acids and bases.  |
| CO4                          | Structural effects and their applications in determining strength of acids and bases.   |
| CO5                          | The common and IUPAC names of alkanes, alkenes, alkynes and homocyclic, polycyclic aromatic hydrocarbons.   |
| CO6                          | Methods of preparation and chemical reactions of alkanes, alkenes, alkynes and homocyclic, polycyclic aromatic hydrocarbons.  |
| CO7                          | Application of Huckel's rule to different organic compounds to find out aromatic /non aromatic characters.  |
| CO8                          | Skeleton of long form of periodic table   |
| CO9                          | Quantum numbers   |
| CO10                         | Shells, sub-shells, types of orbital and their shapes   |
| CO11                         | Afbau, Paulin's exclusion principle and Hunds rule  |
| CO12                         | Block, group, periodic law and periodicity  |
| CO13                         | Name, symbol, electronic configuration, trends and properties   |
| CO14                         | Crown ether and cryptans  |
| CO15                         | Separation of s-block elements with crown ethers  |
| CO16                         | Compounds of s-block elements: oxides, hydroxides, peroxides and superoxides  |
| CO17                         | Application of s-block elements: Industrial, biological and agricultural field  |
| Course<br>Code:Paper II      | FY BSc: Inorganic and Organic Chemistry Sem II  |
| COI                          | Structure, nomenclature, preparation and reactions of organic compounds.  |
| CO2                          | Structure, nomenclature, preparation and reactions of organic compounds.  |
| CO3                          | Predict the conversion of one functional group into other functional group<br>involving<br>one or more number of steps.   |
| CO4                          | Conversion of the given compound into other compound containing more or less<br>number of carbon atoms.   |
| CO5                          | Prediction of possible products when reactants are given. In case there are more than   |

|  | one possible products, identify the major and minor products.   |
|--|---|
| CO6  | Suggest the possible reagents to bring about the given conversion.  |
| CO7  | Concept of isomerism, types of isomers and representation of organic molecules.   |
| CO8  | Conformational isomerism in alkanes with energy profile diagram.  |
| CO9  | Concept of geometrical isomerism with E/Z nomenclature  |
| CO10   | Understanding of optical activity, isomer number, tetrahedral carbon atom, concept<br>of<br>chirality, enantiomerism, R/S nomenclature for single chiral centre.  |
| CO11   | To write electronic configuration of any element.   |
| CO12   | To give reasons for anomolous behavior of first element of IIIA to VII A groups<br>with<br>other  |
| CO13   | To know the exact position p-block elements in the long form of the periodic table.   |
| CO14   | To know the allotropes of carbon.   |
| CO15   | Basic compounds of boron, aluminum, silicon   |
| CO16   | Concept of oxyanions, different than mineral acids, oxyacids of phosphorous & sulphur   |
| CO17   | Overlpping of atomic orbitals of halogens, interhalogen compounds   |
| Course<br>Code:- CH<br>212                               | S.Y. B.Sc: Organic and Inorganic Chemistry Paper II Sem I   |
| CO1  | Identify chiral center in the given organic compounds.  |
| CO2  | Define Erythro, threo, meso, diasteroisomers with suitable examples.  |
| CO3  | Able to find R/S configuration in compounds containing two chiral centers.  |
| CO4  | Explain Bayer's strain theory, Heat of combustion and relates stability of  |
|  | cycloalkanes.   |
| CO5  | cycloalkanes.<br>Explain the stability of cyclohexanes.   |
| CO5<br>CO6   | •   |
|  | Explain the stability of cyclohexanes.  |
| CO6  | Explain the stability of cyclohexanes.         Draw the structure of boat and chair configuration of cyclohexane.   |
| CO6<br>CO7   | Explain the stability of cyclohexanes.         Draw the structure of boat and chair configuration of cyclohexane.         Draw axial and equatorial bonds in cyclohexane.   |
| CO6<br>CO7<br>CO8  | Explain the stability of cyclohexanes.Draw the structure of boat and chair configuration of cyclohexane.Draw axial and equatorial bonds in cyclohexane.Draw structure of conformations of mono- & disubstituted cyclohexanesExplain the stability of axial and equatorial conformation of monosubstituted   |
| CO6<br>CO7<br>CO8<br>CO9                                 | Explain the stability of cyclohexanes.         Draw the structure of boat and chair configuration of cyclohexane.         Draw axial and equatorial bonds in cyclohexane.         Draw structure of conformations of mono- & disubstituted cyclohexanes         Explain the stability of axial and equatorial conformation of monosubstituted cyclohexanes.   |
| CO6<br>CO7<br>CO8<br>CO9<br>CO10                         | Explain the stability of cyclohexanes.         Draw the structure of boat and chair configuration of cyclohexane.         Draw axial and equatorial bonds in cyclohexane.         Draw structure of conformations of mono- & disubstituted cyclohexanes         Explain the stability of axial and equatorial conformation of monosubstituted cyclohexanes.         Define and classify heterocyclic compounds.   |
| CO6<br>CO7<br>CO8<br>CO9<br>CO10<br>CO11                 | <ul> <li>Explain the stability of cyclohexanes.</li> <li>Draw the structure of boat and chair configuration of cyclohexane.</li> <li>Draw axial and equatorial bonds in cyclohexane.</li> <li>Draw structure of conformations of mono- &amp; disubstituted cyclohexanes</li> <li>Explain the stability of axial and equatorial conformation of monosubstituted cyclohexanes.</li> <li>Define and classify heterocyclic compounds.</li> <li>Use Huckel rule to predict aromaticity.</li> </ul>   |
| CO6<br>CO7<br>CO8<br>CO9<br>CO10<br>CO11<br>CO12         | <ul> <li>Explain the stability of cyclohexanes.</li> <li>Draw the structure of boat and chair configuration of cyclohexane.</li> <li>Draw axial and equatorial bonds in cyclohexane.</li> <li>Draw structure of conformations of mono- &amp; disubstituted cyclohexanes</li> <li>Explain the stability of axial and equatorial conformation of monosubstituted cyclohexanes.</li> <li>Define and classify heterocyclic compounds.</li> <li>Use Huckel rule to predict aromaticity.</li> <li>Suggest synthetic route for preparation of various heterocyclic compounds.</li> </ul> |
| CO6<br>CO7<br>CO8<br>CO9<br>CO10<br>CO11<br>CO12<br>CO13 | Explain the stability of cyclohexanes.Draw the structure of boat and chair configuration of cyclohexane.Draw axial and equatorial bonds in cyclohexane.Draw structure of conformations of mono- & disubstituted cyclohexanesExplain the stability of axial and equatorial conformation of monosubstituted<br>cyclohexanes.Define and classify heterocyclic compounds.Use Huckel rule to predict aromaticity.Suggest synthetic route for preparation of various heterocyclic compounds.Write and complete various reactions of heterocyclic compounds.                             |

| CO17                | To know the different methods for separation of gangue or matrix from metallic compounds.   |
|---------------------|---|
| CO18                | To know the terms smelting, flux.   |
| CO19                | To know physico-chemical principles involved in electrometallurgy.  |
| CO20                | To understand electrolysis of alumina and its refining.   |
| CO21                | To explain the uses of Aluminum and its alloys.   |
| CO22                | To know purification of bauxite ore.  |
| CO23                | To explain the term pyrometallurgy and to explain the physico chemical principles involved in the reduction process by carbon monoxide.                   |
| CO24                | To know different reactions in the blast furnace  |
| CO25                | To differentiate between properties of pig iron and wrought iron.   |
| CO26                | To explain the basic principles of different methods for preparation of steel.  |
| CO27                | To explain the merits and demerits of different methods.  |
| CO28                | Definition of corrosion, Types of corrosion, Mechanism of corrosion, Factors affecting corrosion.   |
| CO29                | Methods of prevention of metal from corrosion, Meaning of passivity, Different theories of passivity, Galvanising, Tinning, Electroplating from corrosion |
| Course<br>Code:- CH |   |
| CO1                 | S.Y. B.Sc.: Organic and Inorganic Chemistry Paper II Sem II         Concept of different reagents used in the one type of conversion                      |
| CO1                 | Merits & demerits of different reagents   |
| CO3                 | Reagent based mechanisms  |
| CO4                 | Use of different hydrogen donors for hydrogenation  |
| CO5                 | Define and classify heterocyclic compounds.   |
| CO6                 | Use Huckel rule to predict aromaticity.   |
| C07                 | Suggest synthetic route for preparation of various heterocyclic compounds.  |
| CO8                 | Write and complete various reactions of heterocyclic compounds.   |
| CO9                 | Predict products.   |
| CO10                | Know different biomolecules.  |
| CO11                | Appreciate the role of biochemistry in the day to day life.   |
| CO12                | Understand the importance of biochemistry.  |
| CO13                | Define carbohydrates, Classify carbohydrates giving suitable examples, Write and complete various reactions of glucose                                    |
| CO14                | Explain optical activity in carbohydrates, Write Fischer projection and perspective formula with glyceraldehydes as reference compound.                   |
| CO15                | Explain the principle in Killani Fischer synthesis, Explain stereoisomerism in monosaccharide.  |
| CO16                | Draw structure of some common aldoses and ketoses.  |
| CO17                | Distinguish between diastereomers and epimers.  |

| CO18 | Write cyclic structure of glucose in Fischer, Haworth and chair form.   |
|------|---|
| CO19 | Know the phenomenon of mutaroatation.   |
| CO20 | Draw the structure and bonding in maltose, lactose, cellobiose and sucrose.   |
| CO21 | Know about polysaccharide, structures of starch and cellulose   |
| CO22 | Classify the naturally occurring amino acids.   |
| CO23 | Explains the amphoteric nature of amino acids.  |
| CO24 | Know the important reactions of α-amino acids   |
| CO25 | Outline the formation of peptide bond.  |
| CO26 | Explain the hydrogen bonding in $\alpha$ -helical structure.  |
| CO27 | Relate the stability of $\alpha$ -helical chain and their R-groups.   |
| CO28 | Define primary, secondary, tertiary and quaternary structure of proteins and Classify proteins.   |
| CO29 | To know position of d-block elements in periodic table.   |
| CO30 | To know the general electronic configuration & electronic configuration of elements.  |
| CO31 | To know trends in periodic properties of these elements w.r.t. size of atom and<br>ions,<br>reactivity, catalytic activity, oxidation state, complex formation ablility, colour,<br>magnetic<br>properties, non-stoichiometry, density, melting point, boiling point. |
| CO32 | To understand M-C bond and to define organometallic compounds   |
| CO33 | To define organometallic chemistry  |
| CO34 | To understand the multiple bonding due to CO ligand.  |
| CO35 | To know methods of synthesis of binary metal carbonyls.   |
| CO36 | To understand the structure and bonding using valence electron count (18 electron rule)   |
| CO37 | To understand the catalytic properties of binary metal carbonyls  |
| CO38 | To understand the uses of organometallic compounds in the homogenous catalysis.   |
| CO39 | To define acids and bases according to Arrhenius theory Lowery- Bronsted concept,<br>Lewis concept.   |
| CO40 | To explain the merits and demerits of different theories of acids and bases.  |
| CO41 | To define the conjugate acid and base pairs   |
| CO42 | To explain the leveling effect of solvents.   |
| CO43 | To demonstrate the trends in the strength of hydracids, oxyacids.   |
| CO44 | To define hard and soft acids   |
| CO45 | To know the trends in the strength of hydra and oxyacids.   |
| CO46 | To know the rules governing the strength of oxyacids.   |
| CO47 | To explain the properties of a solvent that determines their utility.   |
| CO48 | To know some useful solvents.   |
| CO49 | To explain the reactions in non-aqueous solvents like HF and NH3.   |
| CO50 | To know toxic chemical in the environment.  |

| CO51  | To know the impact of toxic chemicals on enzyme   |
|---|---|
| CO52  | To know the biochemical effect of Arsenic, Cd, Pb, Hg.  |
| CO53  | To explain biological methylation.  |
| Course<br>Code:- CH   |   |
| 203   | SYBSc .: Practical Course in Chemistry  |
| CO1   | Verify theoretical principles experimentally  |
| CO2   | Interpret the experimental data   |
| CO3   | Improve analytical skills   |
| CO4   | Correlate the theory and experiments and understand their importance  |
| CO5   | Verify theoretical principles experimentally.   |
| CO6   | Acquire skill of crystallisation, record correct m. p. / b. p.  |
| CO7   | Perform the complete chemical analysis of the given organic compound and should be able to recognize the type of compound.  |
| CO8   | Write balanced equation for all the reactions, they carry in the laboratory   |
| CO9   | Perform the given organic preparation according to the given procedure.   |
| CO10  | Follow the progress of the reaction by using TLC technique.   |
| CO11  | Set up the apparatus properly for the given experiments   |
| CO12  | Perform all the activities in the laboratory with neatness and cleanness.   |
| Course<br>Code:- CH   |   |
| 333   | TYBSc.: Organic Chemistry Paper III Sem III   |
| CO1   | Definition and types of organic acid and base   |
| CO2   | The pka and pkb concepts, Effect of temperature on pka/pkb  |
| CO3   | Comparison between strengths of acids/bases   |
| 001   |   |
| CO4   | What is acid-base catalysis   |
| CO5   | What is acid-base catalysis         To draw different types of disubstituted cyclohexane in Chair form  |
|   | What is acid-base catalysis   |
| CO5   | What is acid-base catalysis         To draw different types of disubstituted cyclohexane in Chair form  |
| CO5<br>CO6  | What is acid-base catalysis         To draw different types of disubstituted cyclohexane in Chair form         To distinguish between geometrical and optical isomerism         Stability, energy calculations with potential energy diagram and optical activity of these  |
| CO5<br>CO6<br>CO7   | What is acid-base catalysis         To draw different types of disubstituted cyclohexane in Chair form         To distinguish between geometrical and optical isomerism         Stability, energy calculations with potential energy diagram and optical activity of these conformers.  |
| CO5<br>CO6<br>CO7<br>CO8  | What is acid-base catalysisTo draw different types of disubstituted cyclohexane in Chair formTo distinguish between geometrical and optical isomerismStability, energy calculations with potential energy diagram and optical activity of<br>these<br>conformers.Definition and type of nucleophiles and leaving groups   |
| CO5<br>CO6<br>CO7<br>CO8<br>CO9   | <ul> <li>What is acid-base catalysis</li> <li>To draw different types of disubstituted cyclohexane in Chair form</li> <li>To distinguish between geometrical and optical isomerism</li> <li>Stability, energy calculations with potential energy diagram and optical activity of these conformers.</li> <li>Definition and type of nucleophiles and leaving groups</li> <li>Different types of nucleophilic substitution reactions</li> </ul>   |

| CO18                | The structure of carbonyl group   |
|---------------------|---|
| CO19                | Reactivity concept  |
| CO20                | Correct mechanism of addition reactions using different reagents  |
| CO21                | Types of some known addition reactions  |
| CO22                | Definition and types of elimination reactions   |
| CO23                | Different types of bases and leaving group  |
| CO24                | Statement of Hoffmann and Saytzeff rule   |
| CO25                | The evidences, mechanism & stereochemical aspects of these reactions  |
| CO26                | Whether a given reaction follows E1, E2 or E1cB mechanism?  |
| CO27                | Comparison between E1 & E2 reactions  |
| CO28                | The effect of structure, attacking and leaving group on reactivity of such reactions                                      |
| CO29                | Definition and types of aromatic substitution reactions   |
| CO30                | Classification of directing groups  |
| CO31                | What is an arenium ion and Ipso substitution?   |
| CO32                | The evidences, reactivity and mechanism of these reactions  |
| CO33                | Whether a given reaction follows addition-Elimination or Elimination-addition mechanism?                                  |
| Course<br>Code:- CH |   |
| 343                 | TY BSc .: Organic Chemistry Paper-III Sem IV  |
| CO1                 | Definition and formation of carbanions  |
| CO2                 | Possible mechanism of some known name reactions involving carbanions  |
| CO3                 | Synthetic applications some reagents  |
| CO4                 | To predict product/s or supply the reagent/s for these reactions  |
| CO5                 | Meaning of terms Disconnection, Synthesis, Synthetic equivalence, Functional<br>Group<br>Interconversion, Target Molecule |
| CO6                 | What is retrosynthesis?   |
| CO7                 | Various steps involved in the synthesis of some molecules (detailed mechanism is not                                      |
|                     | expected)   |
| CO8                 | What is rearrangement reaction?   |
| CO9                 | Different types of intermediate in rearrangement reactions?   |
| CO10                | What is Spectroscopy?   |
| CO11                | Different regions of electromagnetic radiations   |
| CO12                | Various terms used in spectroscopy  |
| CO13                | What is the interaction of radiation with matter  |
| CO14                | Types of energy levels with diagram   |
| CO15                | Brief idea about the advantages of spectroscopic methods  |
| CO16                | What is UV Spectroscopy and Beer's law?   |
|                     |   |

| CO3          | Analysis of commercial products  |
| CO4          | Purification of organic compounds  |
| CO5          | Preparations and mechanism of reactions involved   |
| Course Code: |  |
| CH 302       | SYBSc (CBCS) .: Inorganic and Organic Chemistry (DSCC) Sem III   |
| CO1          | Define terms related to molecular orbital theory (AO, MO, sigma bond, pi bond,   |
|              | bond   |
|              | order, magnetic property of molecules, etc).   |
| CO2          | Explain and apply LCAO principle for the formation of MO's from AO's.  |
| CO3          | Explain formation of different types of MO's from AO's.  |
| CO4          | Distinguish between atomic and molecular orbitals, bonding, anti-bonding and nonbonding molecular orbitals.            |
| CO5          | Draw and explain MO energy level diagrams for homo and hetero diatomic   |
|              | molecules.   |
|              | Explain bond order and magnetic property of molecule.  |
| CO6          | Explain formation and stability of molecule on the basis of bond order.  |
| CO7          | Apply MOT to explain bonding in diatomic molecules other than explained in syllabus.                                   |
| CO8          | Define different terms related to the coordination chemistry (double salt,   |
|              | coordination   |
|              | compounds, coordinate bond, ligand, central metal ion, complex ion, coordination                                       |
|              | number, magnetic moment, crystal field stabilization energy, types of ligand,  |
|              | chelate  |
|              | effect, etc.)  |
| CO9          | Explain Werner's theory of coordination compounds. Differentiate between primary                                       |
|              | and secondary valency. Correlate coordination number and structure of complex  |
|              | ion.   |
| CO10         | Apply IUPAC nomenclature to coordination compound.   |

| CO11                       | Identify and draw the structures aromatic hydrocarbons from their names or from structure name can be assigned.  |  |
|----------------------------|--|--|
| CO12                       | Explain / discuss synthesis of aromatic hydrocarbons.  |  |
| CO13                       | Give the mechanism of reactions involved.  |  |
| CO14                       | Explain /Discuss important reactions of aromatic hydrocarbon.  |  |
| CO15                       | To correlate reagent and reactions.  |  |
| CO16                       | Identify and draw the structures alkyl / aryl halides from their names or from structure name can be assigned.   |  |
| CO17                       | Explain / discuss synthesis of alkyl / aryl halides.   |  |
| CO18                       | Write / discuss the mechanism of Nucleophilic Substitution (SN1, SN2 and SNi) reactions.   |  |
| CO19                       | Explain /Discuss important reactions of alkyl / aryl halides   |  |
| CO20                       | Give synthesis of expected alkyl / aryl halides.   |  |
| CO21                       | Identify and draw the structures alcohols / phenols from their names or from structure name can be assigned.   |  |
| CO22                       | Able to differentiate between alcohols and phenols   |  |
| CO23                       | Explain / discuss synthesis of alcohols / phenols.   |  |
| CO24                       | Write / discuss the mechanism of various reactions involved.   |  |
| CO25                       | Explain /Discuss important reactions of alcohols / phenols.  |  |
| CO26                       | To correlate reagent and reactions of alcohols / phenols   |  |
| CO27                       | Give synthesis of expected alcohols / phenols.   |  |
| Course<br>Code:- CH<br>303 | SYBSc(CBCS) .: Practical Chemistry III Sem III   |  |
| CO1                        | Verify theoretical principles experimentally   |  |
| CO2                        | Interpret the experimental data on the basis of theoretical principles   |  |
| CO3                        | Correlate theory to experiments. Understand/verify theoretical principles by experiment observations; explain practical output / data with the help of theory. |  |
| CO4                        | Understand systematic methods of identification of substance by chemical methods.  |  |
| CO5                        | Write balanced equation for the chemical reactions performed in the laboratory.  |  |
| CO6                        | Perform organic and inorganic synthesis and is able to follow the progress of the chemical reaction by suitable method (colour change, ppt. formation, TLC)    |  |
| CO7                        | Set up the apparatus / prepare the solutions - properly for the designed experiments.  |  |
| CO8                        | Perform the quantitative chemical analysis of substances explain principles behind it.   |  |
| CO9                        | Systematic working skill in laboratory will be imparted in student.  |  |

| Subject Code:<br>CH 402 | SYBSc (CBCS): Inorganic and Organic Chemistry (DSCC) Sem IV  |  |
|-------------------------|--|--|
| CO1                     | Isomerism in coordination complexes  |  |
| CO2                     | Explain different types of isomerism in coordination complexes.  |  |
| CO3                     | Apply principles of VBT to explain bonding in coordination compound of different geometries.   |  |
| CO4                     | Correlate no of unpaired electrons and orbitals used for bonding.  |  |
| CO5                     | Identify / explain / discuss inner and outer orbital complexes.  |  |
| CO6                     | Explain / discuss limitation of VBT.   |  |
| CO7                     | Explain principle of CFT.  |  |
| CO8                     | Apply crystal field theory to different type of complexes (Td, Oh, Sq. Pl complexes)   |  |
| CO9                     | Explain: i) strong field and weak field ligand approach in Oh complexes ii)<br>Magnetic<br>properties of coordination compounds on the basis of weak and strong ligand field<br>ligand concept. iii) Origin of colour of coordination complex. |  |
| CO10                    | Calculate field stabilization energy and magnetic moment for various complexes.  |  |
| CO11                    | To identify Td and Sq. Pl complexes on the basis of magnetic properties / unpaired electrons.  |  |
| CO12                    | Explain spectrochemical series, tetragonal distortion / Jahn-Teller effect in Cu(II)<br>Oh<br>complexes only.  |  |
| CO13                    | Identify and draw the structures aldehydes and ketones from their names or from structure name can be assigned   |  |
| CO14                    | Explain / discuss synthesis of aldehydes and ketones.  |  |
| CO15                    | Write / discuss the mechanism reactions aldehydes and ketones.   |  |
| CO16                    | Explain /Discuss important reactions of aldehydes and ketones.   |  |
| CO17                    | To correlate reagent and reactions of aldehydes and ketones  |  |
| CO18                    | Give synthesis of expected aldehydes and ketones.  |  |
| CO19                    | Perform inter conversion of functional groups.   |  |
|                         | Identify and draw the structures carboxylic acids and their derivatives from their names   |  |
| CO20                    | or from structure name can be assigned.  |  |
| CO21                    | Explain / discuss synthesis of carboxylic acids and their derivatives.   |  |
| CO22                    | Write / discuss the mechanism reactions carboxylic acids and their derivatives.  |  |
| CO23                    | Explain /Discuss important reactions of carboxylic acids and their derivatives.  |  |
| CO24                    | Correlate reagent and reactions of carboxylic acids and their derivatives  |  |
| CO25                    | Give synthesis of expected carboxylic acids and their derivatives.   |  |
| 6026                    | Identify and draw the structures amines from their names or from structure name<br>can be  |  |
| CO26                    | assigned.  |  |
| CO27                    | Explain / discuss synthesis of amines.   |  |

| CO28                    | Write / discuss the mechanism reactions amines and their derivatives.  |  |
|-------------------------|--|--|
| CO29                    | Explain /Discuss important reactions of amines and their derivatives.  |  |
| CO30                    | Correlate reagent and reactions of amines and their derivatives  |  |
| CO31                    | Give synthesis of expected amines and their derivatives.   |  |
| CO32                    | Give synthesis diazonium salt from amines and reactions of diazonium salt  |  |
| CO33                    | Draw the structures of different conformations of cyclohexane.   |  |
| CO34                    | Define terms such as axial hydrogen, equatorial hydrogen, confirmation,<br>substituted<br>cyclohexane, etc.  |  |
| CO35                    | Convert one conformation of cyclohexane to another conformation and should able to identify governing structural changes.                                    |  |
| CO36                    | Explain / discuss stability with respect to potential energy of different conformations of cyclohexane.  |  |
| CO37                    | Draw structures of different conformations of methyl / t-butyl monosubstituted cyclohexane (axial, equatorial) and 1, 2 dimethyl cyclohexane.                |  |
| CO38                    | Identify cis- and trans-isomers of 1, 2 dimethyl substituted cyclohexane and able to compare their stability.  |  |
| Subject<br>Code: CH 403 | 3 SYBSc (CBCS)-Practical Chemistry Sem IV  |  |
| CO1                     | Verify theoretical principles experimentally   |  |
| CO2                     | Interpret the experimental data on the basis of theoretical principles.  |  |
| CO3                     | Correlate the theory to the experiments. Understand / verify theoretical principles<br>by<br>experiment or explain practical output with the help of theory. |  |
| CO4                     | Understand systematic methods of identification of substance by chemical methods.  |  |
| C04<br>C05              | Write balanced equation for all the chemical reactions performed in the laboratory.  |  |
| CO6                     | Perform organic and inorganic synthesis and able to follow the progress of the chemical reaction.  |  |
| CO7                     | Set up the apparatus properly for the designed experiments.  |  |
| CO8                     | Perform the quantitative chemical analysis of substances and able to explain principles behind it.   |  |

## Program: B.Sc. (Botany)

| Course Code: BO | F.Y.B.Sc. : Paper Title -Plant life and Utilization I Sem –I         |
|-----------------|--|
| 111             |  |
| CO1             | Students can understand the General identification characters of the |
|                 | lower and higher group of plant taxa.                                |

| CO2  | Understand general characteristics and classification of the Algae, fungi,  |  |
|--|---|--|
| 0.02   | lichens and Bryophytes.   |  |
| CO3  | Life cycle of the <i>Spirogyra</i> , <i>Mushrooms</i> and <i>Riccia</i> with its Utilization and economic importance. |  |
| Course Code: BO  | F.Y.B.Sc. :Paper –II Plan Morphology and Anatomy Sem –I   |  |
| 112  |   |  |
| CO1  | Students know importance of the Morphology for the identification,  |  |
|  | Nomenclature, Classification, and Plant breeding.   |  |
| CO2  | Understanding about the parts, types and functions of the Inflorescence,  |  |
|  | flower and fruit for identification.  |  |
| CO3  | Understand the tissue organization of the plant body, its functions and   |  |
|  | applications.   |  |
| Course Code: BO<br>121   | F.Y.B.Sc - Paper –I Plant life and Utilization II Sem –II   |  |
| CO1  | Introduction of the Plant diversity with study of the Pteridophytes,  |  |
|  | Gymnosperms and Angiosperms.  |  |
| CO2  | Study of the General characteristics and classification of the  |  |
|  | Pteridophytes, Gymnosperms, and Angiosperms.  |  |
| CO3  | Know the Utilization and economic importance of the Pteridophytes,  |  |
|  | Gymnosperms and Angiosperms.  |  |
| CO4  | Study of life cycle of the Nephrolepis, Cycas.  |  |
| Course Code: BO  | F.Y.B.Sc - Paper –II Principles of plant Science Sem –II  |  |
| 122  |   |  |
| CO1  | Know the basic concepts about the plant physiology and cell biology.  |  |
| CO2  | Understand the physiological processes like Diffusion, Imbibition,  |  |
|  | Osmosis, Plasmolysis, plant growth, and growth regulators.  |  |
| CO3  | The study of the types and Ultrastructure of the cell and different cell organelles.                                  |  |
| CO4  | Study the cell cycle in plants.   |  |
| <b>Course Code: BO</b>   | F.Y.B.Sc Practical based on BO 111 and BO 112 and Practical   |  |
| 113  | based on Bo 121 and Bo 122  |  |
| BO 123   |   |  |
| CO1  | Study life cycle of the Lower and Higher cryptogamic plants with  |  |
|  | respect to morphological and Anatomical characteristics   |  |
| CO2  | Utilization and economic importance of the plants.  |  |
| CO3  | Study the Plasmolysis process in plants.  |  |
| CO4  | Estimation of the chlorophyll and carotenoids content of the plant.   |  |
| CO5  | Extraction of the DNA from the plant tissue.  |  |
| CO6  | Study of the cytological techniques –Mitosis and Meiosis cell division.   |  |
| CO7 Documentation of the biodiversity and introduction new ornamer |   |  |
|  | medicinal plants.   |  |
| <b>Course Code: BO</b>   | SYBSc- Paper 1 Sem 1 Name of Course/paper - Taxonomy of   |  |
| 231  | Angiosperms and Plant Ecology   |  |
| CO1  | To understand the basics of taxonomy and apply that information to  |  |
|  | identify plant specimens  |  |
| CO2  | With the help of basics, create the technology for storage of data and it's   |  |

|                        | retrieval  |
|------------------------|--|
| Course Code: BO<br>232 | SYBSc- Paper 2 Sem 1 Name of Course/paper - Plant Physiology   |
| CO1                    | Students understood water and plant relationship, importance of water absorption, translocation, and transpiration.  |
| CO2                    | Importance of various plant growth regulators in life of plants.   |
| CO3                    | Students understood importance of Nitrogen in plants and how plant can<br>obtain Nitrogen by various nitrogen fixation process, how it affects the<br>yield of crop plants.  |
| CO4                    | Importance of seed dormancy breaking methods and factors affect the germination and process will help student to break seed dormancy of some plants by using techniques learnt in this topic.                          |
| CO5                    | Importance of photo light effect and chilling effect important for<br>flowering and fruit setting, techniques learnt in this chapter can be use<br>for inducing flowering in some important crop or ornamental plants. |
| <b>Course Code: BO</b> | SYBSc- Paper 1 Sem 2 Name of Course/paper - Plant Anatomy and  |
| 241                    | Embryology   |
| CO1                    | Student should understand basics of Plant Anatomy and Embryology.  |
| CO2                    | Knowledge of Plant Anatomy can useful in further research in Plant biochemistry.   |
| CO3                    | Basics of Plant Embryology could be usefu in producing hybrids or cybrids, which is useful in Agriculture.   |
| CO4                    | Identification of Plant specimen with the help of Anatomical features.   |
| Course Code: BO        | SYBSc- Paper 2 Sem 2 Name of Course/paper - Plant Biotechnology  |
| 242                    |  |
| CO1                    | Student can able to Produce amylase, proteases and lipase enzyme with  |
|                        | the help of enzyme technology at laboratory level, Enzymes   |
|                        | immobilization - concept and techniques of immobilization.   |
| CO2                    | Citric acid production at laboratory level student can perform.  |
| CO3                    | Student will able to produce of SCP from algae (Spirulina) and fungi (Yeast) and its economic importance.  |
| CO4                    | Phytoremediation with the help of various methods can be achieved.   |
| CO5                    | DNA isolation and its important in gene cloning.   |
| Course Code: BO<br>243 | SYBSc - Practical Paper III  |
| CO1                    | Students classify and identify the flowering plant families on the basis of their morphological and floral characters.   |
| CO2                    | Students are able to check Water Holding Capacity of Soil.   |
| CO3                    | Students understand basics of <i>Spirulina</i> cultivation & fermentation and they able to make it as business opportunity.  |
| Course Code: BO<br>331 | T.Y.B.Sc. Paper 1 Sem-3 Cryptogamic Botany   |
| C01                    | The students get knowledge about the general characters, classification, and economic importance's of the lower and higher cryptogams.   |
| CO2                    | The students get the detailed knowledge about the different examples<br>from Algae, Fungi, Bryophytes and Pteridophytes with respect to  |

|   | taxonomic position, Morphology, anatomy, reproduction, gametophytes,   |  |
|---|--|--|
|   | sporophyte and economic importance.  |  |
| CO3   | Student can able to classify the plants on the basis of different  |  |
|   | Morphological, Anatomical and Reproductive characters.   |  |
| CO4   | The students can undertake the plant biodiversity survey projects.   |  |
| <b>Course Code: BO</b>  |  |  |
| 332   |  |  |
| CO1   | Students learn details about plant cell and their function at molecular  |  |
|   | level  |  |
| CO2   | Students knows the importance of cellular and molecular techniques in  |  |
|   | plant science  |  |
| <b>Course Code: BO</b>  | T.Y.B.Sc. 3 Sem-3- Name of Paper-Genetics and Evolution  |  |
| 333   |  |  |
| CO1   | The ability to evaluate conclusions that are based on genetic data.  |  |
| CO2   | Have an enhanced knowledge and appreciation of evolutionary biology  |  |
|   | and behavior.  |  |
| CO3   | Analyze different Chromosomal Aberrations.   |  |
| CO4   | To evaluate direct & indirect evidences from fossil records, genetics &  |  |
|   | bio-geographical relations.  |  |
| CO5   | The study of concept of evolution helps to understand the different  |  |
|   | theories of evolution and the origin of life.  |  |
| Course Code: BO T.Y.B.Sc. Paper 4 Sem-3- Name of Course/paper- Spermate |  |  |
| 334   | and Palaeobotany   |  |
| CO1   | Student knows the economic importance of Gymnosperm.   |  |
| CO2   | Student Identify and classify Flowering plant families.  |  |
| CO3   | Learn the of conservation of plants and preparation of herbarium.  |  |
| CO4   | Evaluation of fossil plant for Phylogenic study.   |  |
| CO5   | Student knows the importance of Fossil plant/animals.  |  |
| Course Code: BO   | T.Y.B.Sc. Paper 5 Sem-3- Horticulture and Floriculture   |  |
| 335   |  |  |
| CO1   | Students can propagate the plants with vegetative and sexual methods of  |  |
|   | propagation.   |  |
| CO2   | Students know horticultural practical skills for vegetative propagation of   |  |
|   | plants through Cutting, Layering, Grafting and budding.  |  |
| CO3   | Students get the knowledge about the fruit and vegetable production  |  |
|   | technology such as Banana, Mango, Tomato, Peas, Beans and import   |  |
| CO4   | and export potentiality of Horticultural crops.Students can take the cultivation of Important floricultural crops like |  |
| 04  | Aster, Gladiolus, Orchids, and <i>Tagetus</i> .  |  |
| CO5   | The students get the applied knowledge of different methods of drying  |  |
|   | of cut flowers and preservation techniques.  |  |
| Course Code: BO   | T.Y.B.Sc. Paper 6 Sem-3- Name of Course/paper: Computational   |  |
| 336   | Botany   |  |
| CO1   | L'U WILL J   |  |
| 1                                 |  |  |
|   | Biostatistics play important role in medicine, Biology & public health.  |  |
| CO2<br>CO3  |  |  |

| CO4              | To analyze result obtained from computed data in a specific manner.  |  |

| Course Code:     | To apply technology for computation of collected data.T.Y.B.Sc. Paper 1 Sem 4 Name of Course/paper - Plant Physiology                  |  |
| BO.341           | & Biochemistry   |  |
| CO1              | Student knows the importance of photosynthesis and Respiration for the   |  |
| COI              | ecosystem.   |  |
| CO2              | Student learnt the effect of stress on crop plants.  |  |
| CO2              | Student identifies the role of enzyme in living system and its benefits.   |  |
| CO4              |  |  |
| Course Code: BO  | Student described Role of secondary metabolites and human health.T.Y.B.Sc. Paper 2 Sem 4 Name of Course/paper- Plant Ecology and       |  |
| 342              | Biodiversity   |  |
| CO1              | Students should attract and focused towards wild life Conservation and   |  |
|                  | try to find out solutions on threats to nature at individual level first and   |  |
|                  | later at scale level.  |  |
| CO2              | Students have opportunity to work on Environmental Impact  |  |
|                  | Assessment projects and have jobs in Environmental Audit company &   |  |
|                  | in Remote sensing department.  |  |
| CO3              | Students aware of importance of biodiversity and its conservation.   |  |
| CO4              | Students identify the various disciplines of biodiversity.   |  |
| CO5              | Students determine the best predictors of success for protected area in  |  |
|                  | conserving biodiversity.   |  |
| Course Code: 343 | T.Y.B.Sc Paper 3 Sem 4 Plant Pathology   |  |
| CO1              | The course helps the students to know the basic concepts about the   |  |
|                  | different terminologies about the plant pathology, introduction of plant   |  |
|                  | pathology, economic importance of plant diseases.  |  |
| CO2              | The students can gain the information about the different stages in the  |  |
|                  | disease development, disease forecasting, measurement of plant disease,  |  |
|                  | and yield loss. The students get the detailed knowledge about the  |  |
|                  | preexisting and induced structural and biochemical defense Mechanism.  |  |
| CO3              | Microscopic and Macroscopic study of the different plant diseases  |  |
|                  | would be possible by using different culture techniques, media types,  |  |
| ~~ /             | and preparation.   |  |
| CO4              | Students can identify different Fungal and bacterial diseases with   |  |
| 00 <i>5</i>      | respect to causal organism, symptoms, and control measures.  |  |
| CO5              | The students get the information about impact of non-parasitic diseases,   |  |
|                  | abiotic causes of the non parasitic diseases, Principles of plant disease  |  |
|                  | control with respect to biological, chemical, Effective Microorganism  |  |
|                  | Solution (EMS) and Microbial pesticide, Study of Integrated Pest   |  |

| SemIV<br>Theory Paper-<br>IV<br>Immunology-I<br>SemIV<br>Theory Paper-V<br>Fermentation<br>Technology-I | To study Major Histocompatibility complex,<br>cytokines, antigen-antibody Interaction<br>,Immunohematology.<br>To study Public health immunology, hypersensitivity.<br>To study the solid state fermentation and<br>submerged fermentation<br>To study large scale production of primary and<br>secondary |
| SemIV<br>Theory Paper-VI<br>Agricultural and<br>Environmental microbiology                              | metabolites, enzymes, steroids, milk products,<br>vaccines, immunesera and biomass based<br>products.<br>To study the effect of microbes on agriculture<br>and environment.   |
| Practical course –I<br>Applied<br>Microbiology  | To study laboratory scale fermentation and tests for<br>milk and dairy products.<br>To study Isolation and identification of different<br>plant pathogens, pesticide degraders lactic<br>cultures.<br>To study Quality assurance tests.<br>To study biosynthesis of nanoparticles                         |
| Practical course –II<br>Biochemistry and Molecular<br>biology   | To study random sugar estimation and lipid<br>profiling To study enzyme kinetics<br>To study the protocols for plasmid isolation<br>DNA isolation and transformation.<br>To study bacteriophages.   |
| Practical course –III<br>Diagnostic Microbiology<br>and Immunology                                      | To study immune hematology, agglutination test,<br>immune precipitation and hemogram<br>To study clinical microbiology<br>To study how to prepare survey for epidemiology.  |

## **Mathematics Course Outcomes**

| SR.NO. | SUBJECT               | LEARNING OUTCOMES                                     |
|--------|-----------------------|---|
| 1.     | Semester –I           | 1. Student will understand idea of permutation and    |
|        | Paper I               | combination.  |
|        | MT-111 Algebra        | 2. Student will understand basic proof envolving      |
|        |                       | sets and function.                                    |
|        | Paper II              | 3. Student will understand various type of tree       |
|        | MT-112 Calculus –I    | and method for traversing tree.                       |
|        |                       | 4. Student will understand boolean algebra and        |
|        | Paper III             | truth table.  |
|        | MT-113Mathematics     | 5. Student improve their logic                        |
|        | Practical             |   |
|        |                       |   |
|        | Semester –II          |   |
|        | MT-121                |   |
|        | Analytical Geometry   |   |
|        | Analytical Geometry   |   |
|        | MT-122                |   |
|        | Calculus –            |   |
|        |                       |   |
|        | II MT-123             |   |
|        |                       |   |
|        | Mathematics Practical |   |
| 2.     | (MTC-102)ALGEBRA AND  | i. apply rule of limit to calculate limits.           |
|        | CALCULUS              | ii. student will understand find derivative of        |
|        |                       | function.   |
|        |                       | iii. student will understand the fundamental          |
|        |                       | theorem to calculate evaluate definite integral       |
|        |                       | and to differentiate function definite as a           |
|        |                       | integral  |
|        |                       | ·   |
|        |                       | iv. use the derivative to find tangent line to curves |
| 3.     | (MTC-103) MATHEMATICS | i. to better appreciate the variety of subjects       |
| 2.     | PRACTICAL COURSE      | m1 and m2.  |
|        |                       | ii. the course intents to help the students think     |
|        |                       | logically and critically about mathematical           |
|        |                       | information.  |
|        |                       | iii. we introduced to some exciting idea in           |
|        |                       | mathematics that come from a wide variety to          |

|    |                                     | disciplines along with real world applications.  |
|----|-------------------------------------|--|
| 4. | (MTC-211) APPLIED<br>ALGEBRA        | <ul> <li>i. present basic concept of matrices and matrix algebra .</li> <li>ii. present basic concept of vector space .</li> <li>iii. present concept of linear transformation .</li> <li>iv. present method of computing and using eigen value and eigen vector.</li> </ul>   |
| 5. | (MTC-212) NUMERICAL<br>ANALYSIS     | <ul> <li>i. develop appropriate numerical method to<br/>approximate the function .</li> <li>ii. develop appropriate numerical method to solve<br/>a differential equation.</li> <li>iii. derive appropriate numerical method to<br/>evaluate a derivative at a value.</li> <li>iv. performed an error analysis for<br/>various numerical method.</li> <li>v. student apply these methods in various field .</li> </ul> |
| 6. | (MTC-221) COMPUTATIONAL<br>GEOMETRY | <ul> <li>i. an introductory course to<br/>computational geometry and it's<br/>application.</li> <li>ii. we discuss techniques needed in designing<br/>and analyzing efficient algorithm for problem in<br/>geometry.</li> <li>iii. we develop idea geometric data structure e<br/>and motion planning.</li> <li>iv. student use these ideas in animation .</li> </ul>  |
| 7. | (MTC-222) OPERATION<br>RESEARCH     | <ul> <li>i. identify and developed operational research<br/>models from the verbal description of the real<br/>system.</li> <li>ii. understand the mathematical tools that are<br/>needed to solve optimization problem.</li> <li>iii. develop a report that describe the model and<br/>solving techniques.</li> <li>iv. student use these ideas in various managerial<br/>problem .</li> </ul>                        |
| 8. | (MTC-223) PRACTICLE                 | <ul> <li>i. to solve mathematical problem by using c-programme.</li> <li>ii. represent geometrical diagrams using scilab.</li> <li>iii. student can solve any mathematical problems by using scilab and c programing .</li> <li>iv student can interact with mathematics and computer .</li> </ul>   |
| 9. | STATISTICAL METHODS-I               | <ul> <li>i. the fundamental purpose of statistics is to<br/>identify out a sample, results that are valid for<br/>entire population.</li> <li>ii. descriptive statistics allow an easy introduction<br/>to the theory to the probability .</li> <li>iii. at a preliminary stage the sample should be</li> </ul>  |

|     |                        | simplified through it's representation in graphs<br>and charts as precise as possible without<br>loosing to much information<br>iv. to devolved logic of the student.<br>v student can handle statistical models .   |
|-----|------------------------|--|
| 10. | STATISTICAL METHODS-II | <ul> <li>i. student will understand idea of permutation, combination and various counting.</li> <li>ii. to motivate the use of statistical inferences in practice data analysis.</li> <li>iii. to study elementary concepts and techniques in statistical methodology.</li> <li>iv. to provide a introduction to subsequent statics courses.</li> </ul>  |
| 11. | STATISTICS PRACTICLE   | <ul> <li>i. the various design probabilities for a research project and the important consideration for observational studies and randomized thetrials</li> <li>ii. the types of the data generated in research studies .</li> <li>iii. particulars methods are appropriate and how to interpret their results.</li> <li>iv. the focus is mainly on interpretation and understanding appropriate methodology.</li> </ul> |
